1. The following "prior art" is noted:

**A) US Patent #6,453,115 to Boyle (cited by applicant in the IDS of 3/29/2007):**

As shown in Figure 1, Boyle discloses a playback device for trick play operation comprising:

- 1) A first processor means (@104 and 106) for:
  - a) Receiving a video stream (@ 102);
  - b) Storing the received video stream in a storage subsystem or "buffer" (@ 110);
  - c) Generating "meta data" (@ 106) that identifies the start of video frames of the stored video stream (@ 112); and
  - d) Storing the meta data (@ 114) in the storage subsystem or "buffer" (@ 110);
- 2) The storage subsystem or "buffer" (@ 110); and
- 3) A last processing means (@ 116) which processed appropriate ones of the stored video frames (@112) as determined by and additional processing means (@ 120) frame using the stored meta data (@ 114), and inherently responsive to a trick play request (i.e., the system would not go into the trick play mode without such a request).

**B) US Patent #7058721 to Ellison et al.:**

As is shown in Figure 1B, Ellison discloses a playback apparatus comprising:

- 1) A client terminal (e.g., @ 160) which includes:
    - a) A "last processing means" comprised of an MPEG decoder; and
    - b) A buffer associated with the decoder;
- wherein the "last processing means" and the buffer operate to display frame of video data in a trick/seek play mode,

[Note lines 39-51 of column 16]

2) A storage device (@ 14) for storing:

a) An MPEG file (@104); and

b) An associated meta data file (@ 106); and

3) A "first processing means" comprised of a server (e.g., @110) which, in response to a trick/seek play request, operates to supply the buffer associated with the "last processing means", i.e., the MPEG decoder, subsequent frames of video data using the associated meta data [Note lines 39-62 of column 16].

[Note: Lines 36-40 of column 5; lines 22-31, 46-51, and 56-58 of column 7; lines 47-48 of column 8; lines 51-53 of column 9; lines 3-30 of column 12; lines 4-16 and 43-48 of column 13; and 39-51 of column 16]

**C) US Patent Document #2006/0029364 to Kosugi:**

As is shown in Figure 1, Kosugi discloses a playback apparatus which comprises a buffer (@ 120-128) for buffering a plurality of MPEG video data frames and a MPEG decoder (@ 112) for decoding selected ones of the buffered frames during trick play operation.

[Note paragraphs 0017, 0018, 0029, 0030, 0035, and 0036-00391]

**2. The following is an examiner's statement of reasons for allowance:**

*1) As recited in the content of claim 1, the examiner has construed the "first processing means" recitation and the "last processing means" recitation as necessarily being different "processing means". As such, with respect to claim 1, the examiner contends that the "prior art" art of record does not show or fairly suggest a method to be performed on a payback device that is comprised of a plurality of "processing means" and a buffer, wherein the plurality of processing means process stored multimedia content in a serial manner, and wherein at least: an appropriate frame for processing at a last processing means is determined in response to a trick play request that is received during regular playback; the appropriate frame is retrieved from the buffer using meta data stored in the buffer which identifies the frame; a second appropriate frame for processing by a first processing means is selected in stored multimedia content in response to said trick play request received during regular playback; and processing the second appropriate frame so that the second frame is available to the last processing means when the last processing means has completed the processing of the retrieved frame.*

*The examiner contends that claim 8 is allowable for like reasons.*

**Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."**

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID E. HARVEY whose telephone number is (571) 272-7345. The examiner can normally be reached on M-F from 6:00AM to 3PM.
